

Premium Limited Series by O'Clock Airsoft

When a replica stands out above the rest, it's no coincidence. The SAIGO TOKEI, handcrafted by O'Clock Airsoft, redefines what true power and precision mean on the field. Each unit has been tuned with the same meticulous care as a luxury timepiece, blending engineering mastery with flawless energy delivery.

Its response is immediate, its cycle powerful, and its performance consistent — even with heavier BB weights. It doesn't aim to be discreet: it commands presence and delivers the reliability you demand in every shot.

Only 10 units exist worldwide, each numbered and certified.

This is not just another replica — it's a collector's piece created for those who demand performance without compromise or nonsense.

"A replica built to hit hard. Period."

Secure yours before it becomes history.

Exclusive edition of only 10 units, each one handcrafted by watchmaker and technician O'CLOCK AIRSOFT. A unique replica, laser-engraved with the Tokei logo and the builder's signature, combining precision engineering, extreme reliability, and top-tier field performance. Includes Tan-colored transport case and an exclusive Tokei Series patch.

HIGH-PRECISION MECHANICS

Each unit features a machined gearbox, ultrasonically cleaned and polished, CNC-made Saigo 18:1 steel gears, and reshimming adjusted to hundredth precision.

The laser-engraved piston with a machined rack and JOULE MASTER CNC head ensures flawless energy transfer even with heavy BBs.

A SAIGO Brushless 31,000 RPM motor guarantees instant response and low power consumption.

PRECISION & HOP-UP SYSTEM

Equipped with a 6.03 mm slotted and polished inner barrel, Retro Arms CNC micrometric chamber, and Maple Leaf 60° bucking, it achieves tight and consistent groupings up to 65 meters, maintaining a high hit ratio.

Its peak efficiency lies between 0.30 and 0.36 g BBs, delivering an average output of 1.10 joules.

SMART ELECTRONICS

Total control with the Jefftron Scylla V2 electronic trigger featuring Bluetooth connectivity and mobile app integration.

It allows you to customize fire modes, trigger response, and interference protection — ensuring maximum reliability.

Includes QR code access and a unique serial password engraved on the replica's body.

GUARANTEED QUALITY CONTROL

Every SAIGO TOKEI replica undergoes rigorous testing:

- Stress test and electronic diagnostics
- Thermal and consumption check
- Hop-up and grouping verification at 65 m
- Security seals and tamper-proof warranty

Average power readings:

0.25 g	1.14 J	} Optimal performance with 0.30–0.36 g BBs.
0.28 g	1.13 J	
0.30 g	1.10 J	
0.32 g	1.07 J	
0.36 g	1.06 J
